

## INTE-TRANSIT 3<sup>rd</sup> Training Workshop

19 November 2014, Valencia, Spain

*"Strategic planning in ports and logistics & related security frameworks  
for container transport and ro-ro"*

### Objectives

- To understand how strategic planning and secure logistics frameworks impact and can improve the port competitiveness and the transit capacities.
- To understand the ICT role to get competitive and secure ports.
- To get acquainted with the logistics management models and standards that could contribute to improve the efficiency and transit capacities in freight transport.
- To get familiarized with emerging ICT protocols and software tools that support secure & safe and efficient logistics organization and activities.

### Target group

Professionals of port authorities or logistics activity areas bounded to maritime ports, as well as other logistics partners.
