

INTE-TRANSIT 2nd Training Workshop

13-14 May 2014, Naples, Italy

*“Improvement of MED ports transit capacities through multimodality and intermodality.
Towards a more efficient organization of ports logistic activities.”*

Objectives

- To understand how multimodality, intermodality and logistics organization can improve the ports transit capacities and transit capacities.
- To understand the ICT role in an efficient and sustainable intermodality, multimodality and logistics organization.
- To get acquainted with the logistics organizations that could contribute to improve maritime accessibility and transit capacities in freight transport.
- To get familiarized with emerging ICT protocols and software tools that support logistics organization and activities.
- To identify logistics procedures that would benefit from the deployment of state of the art ICT systems and propose improvements.

Target group

Professionals of port authorities or logistics activity areas bounded to maritime ports, as well as other logistics partners.
